MEMORANDUM FOR DISTRIBUTION

SUBJECT: Secure Telephone Unit (STU-II) (U)

1. [] The first full-production multiyear (FY-82/83) contract for STU-II units was awarded in December 1982. The contract contains approximately 2,000 nationally funded units with initial deliveries scheduled for July 1984.
2. [] In order to achieve the most rapid deployment of the STU-II equipments, we plan to award in FY-83 a second multiyear contract on a competitive basis for the balance of the nationally funded units and other individual customer-funded units. Customer-funded FY-83 requirements, beyond the nationally funded units, are required by 1 March 1983. Further, FY-84 and FY-85 quantitative requirements to be incorporated into this multiyear STU-II contract, or options thereto, must also be received by 1 March 1983.
3. [] For Civil Agency customers, a statement that FY-84/85 requirements are included in the Agency's FY-84/85 program or budget is required. Any requirements received without this certification will not be included in the multi-year provisions of the contract, but could be accommodated, at a probable higher cost, by exercising options or add-ons as funds are approved. Any multiyear requirements that are not subsequently funded are subject to a cancellation charge allowing for reimbursement of unrecovered, nonrecurring costs included in prices for cancelled items.
4. [] In order to satisfy identified needs for STU-II operation with four-wire telephone systems, a four-wire operational mode, including multilevel precedence and preemption, has been included in the full-production units. However, to implement this mode, a separate four-wire adapter unit is needed. FY-83 funded requirements and FY-84/85 quantitative requirements for the four-wire adapter are also required by 1 March 1983.

5. [] Finally, we have been made aware of the potential for a number of urgent national-level priority needs for STU-II. In order to respond to these on an expedited basis, we can arrange a special augmentation to the current Limited-Rate-Initial-Production (LRIP) contract for approximately 150 STU-IIs. These units could be delivered at a 30-unit per month rate starting seven months after receipt of funds. To implement this augmentation, funding must be received by 1 March 1983. Further, a statement outlining the delivery urgency is needed that justifies the significant price premium and single-source award for early delivery of these units.

6. [] The attached Table, "STU-II Cost and Availability," provides the necessary information to submit orders. Orders should be forwarded to:

Director
National Security Agency
ATTN: S53
9800 Savage Road
Fort George G. Meade, MD 20755

PL 86-36

7. [] In the event any additional information is required, please call Mr. [] 301-688-8181 (commercial) or 235-8181 (AUTOVON).
